Sinner	11–4	9–1	2–0	1–0	7–10	10–7	1–0	4–1	—

McEnroe Group first, then Lendl Group. Sinner is out injured.

Data through November 14, 2026 | tennis-db.com

Tennis-DB.com

Zverev has a winning record against all three of his group opponents, including six wins without a loss against Shelton. Shelton and Jodar have never met.

The 2026 season

Zverev has won two majors this year. Alcaraz has five titles across three levels, while Shelton has four. The title columns show each player's total and the breakdown by tournament level. Top 10 records use the opponent's ranking at the time of the match.

The 2026 season

Current ATP rank; 2026 main-draw records and titles. Top 10 = opponent's rank at the match.

Rank	Player	W	L	Win %	Top 10 W	Top 10 %	Titles	GS	1000	500	250
1	Zverev	61	16	79.2%	3	27.3%	2	2	0	0	0
4	Shelton	45	17	72.6%	3	42.9%	4	0	1	2	1
7	Fils	39	16	70.9%	5	50.0%	2	0	1	1	0
11	Jodar	43	19	69.4%	2	28.6%	1	0	0	0	1
3	Alcaraz	41	5	89.1%	6	75.0%	5	1	1	3	0
5	Medvedev	52	20	72.2%	2	33.3%	4	0	0	1	3
6	Cobolli	35	22	61.4%	4	57.1%	1	0	0	1	0
8	Tiafoe	44	21	67.7%	5	50.0%	1	0	0	1	0
2	Sinner	44	3	93.6%	10	90.9%	6	1	5	0	0

McEnroe Group first, then Lendl Group. Sinner is out injured.

The advanced numbers

Elo rates players from match results and the strength of their opponents. It carries over from year to year. **Performance+** also uses the score: winning comfortably against a strong opponent earns more credit. A score of 100 is average.

Serve+ and **Return+** measure points won above or below expectation, accounting for opponents and the season's scoring averages. Zero is average. A Serve+ of +5 means five percentage points above expectation on serve.

Point dominance (PD) divides the percentage of return points won by the percentage of serve points lost. Winning 36% of return points and losing 30% of service points gives 1.20; 1.00 is even. **Total points won (TPW)** is the average percentage won across matches with available statistics.

The advanced numbers

Current Elo and 2026 statistics. PD = point dominance; TPW = total points won.

Player	Elo	Perf.+	Serve+	Return+	PD	TPW %
Zverev	2124	167.9	+6.89	+2.27	1.302	53.4%
Shelton	2040	158.5	+5.63	-0.84	1.161	52.1%
Fils	1985	163.2	+2.54	+1.58	1.085	51.4%
Jodar	1940	158.4	+0.11	+5.26	1.146	52.5%
Alcaraz	2345	172.8	+3.68	+7.13	1.332	54.7%
Medvedev	1998	160.5	+1.80	+5.00	1.218	53.3%
Cobolli	1871	141.5	-1.26	+0.91	0.961	49.4%
Tiafoe	1948	156.5	+1.14	+1.19	1.054	51.0%
Sinner	2416	171.5	+8.36	+6.36	1.604	56.8%

McEnroe Group first, then Lendl Group. Sinner is out injured.

Data through November 14, 2026 | tennis-db.com

Tennis-DB.com

Hard courts have suited Medvedev and Shelton particularly well. Medvedev has won 73% of his career matches on hard courts, compared with 61% on clay and grass combined; Shelton's figures are 66% and 56%. Alcaraz has been stronger on clay and grass, winning 86% there against 79% on hard courts. Cobolli has also done better away from hard courts, at 61% against 51%. These career records include both indoor and outdoor tennis.

Conclusion

Alcaraz is the clear favorite in the projection, with a 65.7% chance of winning the title. Zverev follows at 14.5%, then Shelton at 8.3%. The estimates average two forecasts: one based on overall Elo and one on hard-court Elo. Both use the actual groups.

Who will win in Turin?

Estimated title chances, using the actual groups and best-of-three matches.

Player	Overall Elo	Hard-court Elo	Average
Alcaraz	70.1%	61.3%	65.7%
Zverev	14.1%	14.9%	14.5%
Shelton	5.7%	11.0%	8.3%
Medvedev	3.7%	7.4%	5.5%
Fils	2.7%	2.5%	2.6%
Tiafoe	1.8%	2.2%	2.0%
Jodar	1.4%	0.6%	1.0%
Cobolli	0.5%	0.2%	0.4%

Average gives equal weight to the two forecasts. Assumes no withdrawals.

Methodology

Data are through November 14, 2026. Match records cover main-draw singles at individual tour events, including the Olympics. Qualifying and team events are excluded. Retirements count; walkovers do not count as matches, but titles awarded by walkover count.

Elo uses the site's broader played-singles history, including qualifying. The other advanced figures use the site's 2026 calculations. Point-stat samples range from 46 to 76 matches, and percentages are averaged by match. Career surface percentages are descriptive and do not adjust for opponents.

The title forecasts use Elo's standard match-probability formula and 200,000 simulations per group for each model, followed by exact semifinal and final probabilities. Group ties follow the tournament's head-to-head, set, and game rules. Set probabilities are derived from match probabilities; game scores for ties are sampled from completed 2026 hard-court sets in the comparison. Ratings stay fixed, and no withdrawals are assumed. Hard-court Elo covers indoor and outdoor matches. These are simple rating-based estimates; the average has not been tested as a tournament forecasting model.
